

ENGINEERING CHALLENGE CUP 2020

Bulletin 11

ECC2020 General Information, ECC APP

See the count-down on the website if you lost track of time

84_{DAYS}

2_{HOURS} 44_{MINUTES} 24_{SECONDS}

UNTIL

ECC2020 TROGIR – DUBROVNIK, CROATIA

The co-operation with High Point Yachting is getting in a natural flow. We met Sasha again last week while Sasha was visiting The Netherlands for another regatta, so we could align details as we are getting closer towards our event.

Crew wanted

More than one skipper is having problems to get sufficient crew to participate. We ask all to think about potential crew, ladies as well as gentlemen, are more than welcome to participate. Please send us contact details, or entre the website via “crew” so we can follow up and find a suitable boat. If there are skippers who are looking for additional crew, please let us know as well.

Emergency support

We kindly ask doctors or medical specialists to make themselves known to the OC, name/boat nr/telephone nr/Languages spoken. We will issue a safety document with all relevant contact-information in case of any emergency. This document will be available via the website and the App in due time.

Sponsoring

Please review the new sponsors at the end of this bulletin for your interests. Without sponsoring the ECC would be a very sober event, and we are very pleased to share that we now finalized our sponsor lobby with all logo's on our new polo's. You will receive these at registration in Trogir. If there are additional sponsors to create the cream on the pudding, don't know if this is a something stupid to say, however new sponsors are very welcome off course.

ENGINEERING CHALLENGE CUP 2020

ECC App launch

We will launch the new ECC App soon. One necessity to enter the App is an email address for each participant, being part of the crew list.

So please note that missing crewlist-email information may lead to not being able to enter the App. Instructions how to download the App and to use the App will come soon. All **335** registered crew members and skippers will receive an invitation for the app by email.

Another new feature is the possibility to track the boats during racing. This enables you to see where you are during the race and to evaluate your race track. (Also versus other boats in the fleet) This feature however, will not have any influence on any official race results, it is just more additional fun.

This feature, which will not be obligatory, need to have one mobile phone on board of each boat with an additional app installed and must be plugged in a power source during sailing. As the App requires more than normal power consumption sending out and receiving a GPS signal.

Same for this option, more information to follow towards the skippers.

Crew out-fitting

For those who want to order any crew outfit, shirts polo's jacket's etc, with the ECC2020 logo, please contact:

www.worldleisurewear.com/ecc

Dubrovnik extension information

For those who want to stay a bit longer in Dubrovnik:

www.telegraph.co.uk/travel/destinations/europe/croatia/dubrovnik/articles/dubrovnik-travel-guide/
